Telecommunications and Computer Engineer with experience in software development, specialized in frontend development. I have participated in various projects where I have strengthened my knowledge in modern technologies such as Next.js, React, TypeScript, JavaScript, Node.js, Tailwind CSS, HTML, and CSS, as well as in the use of current tools for agile web application development.

I am characterized by my continuous learning ability, adaptability, and commitment throughout all stages of the software development lifecycle, adding value both technically and in teamwork.
